Let there be light!

Inception of an enlightened idea:

Taking immense pride as an automotive lights manufacturing firm since 1976, we have the will and the strength to go the distance with fully equipped machinery and in-house research and development team, topped with power press, moulding machines and the tool room. A dream that started with manufacturing of bicycle parts and sheet metal works, transformed into manufacturing of lights mostly out of steel instead of plastic. It was a turning point for the company to transform the manufacturing from steel to plastics. The company with the help of the new staff and new machinery started to manufacture plastic tail lamps & side lamps. As a matter of fact, we are mostly into manufacturing of tail lamps for vehicles.

Our enlightened clients:

We have been associated with reputed OEMs from 1976 to 1980. Keeping up with the tradition of good work, the company supplies goods all over India. We manufacture products for companies like Tata, Ashok Leyland, Mahindra & Mahindra, Eicher Canter and few products for Maruti.

Throwing light on our Infrastructure:

We have a well-equipped a state-of-the-art industry running in Bawana, New Delhi.

Technology to light up lives:

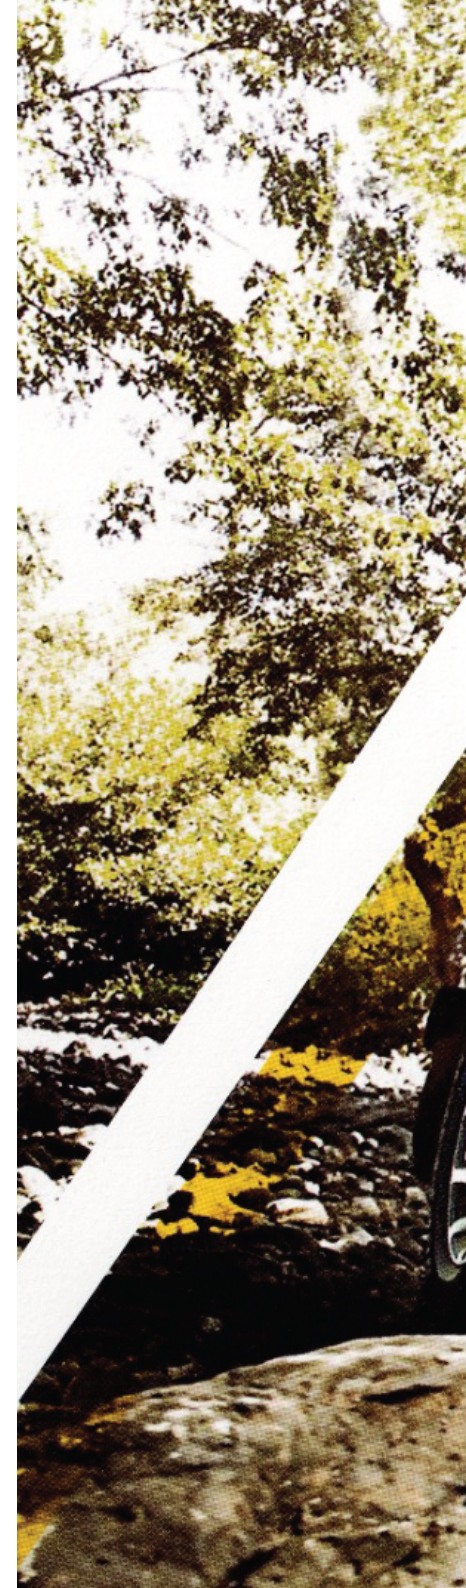

Our company is taking huge stride towards getting into LEDs and tractor lighting. Our research and development team is constantly working on what the future of automotive lighting would be like, contemplating steps toward working on what better outcomes we could get out of the existing technologies and inventions.

Market standing to light up the way:

Ours is a renowned brand in the automotive lighting manufacturers in India. We believe in perfection and quality-led finishing of the work. Customer satisfaction stands first, hence we do not believe in supplying low quality goods. Our rates are fixed and we do not believe in giving discounts.

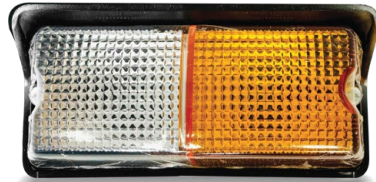

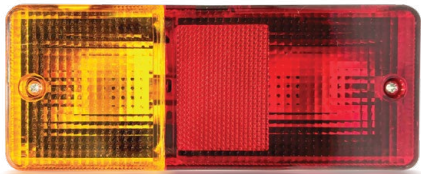

Note

- We suggest all our customers to check the goods.
- Packaging charges and transportation charges will be extra.
- Price list does not include taxes, hence taxes will be applicable.

OUR ALL NEW RANGE IN TRACTOR SEGMENTS MEETING THE OEM STANDARDS. WHERE MOST OF THE PRODUCTS HAVE HIGH TENSILE STRENGTH HOUSING (ABS) LENS (PMMA). SOON WE WILL ALSO MOVE INTO TRACTOR SMD PRODUCTS.
